

# ATTENTION: CARIBBEAN FISHERS

**THE HURRICANE SEASON IS HERE – MONITOR THE WEATHER!**

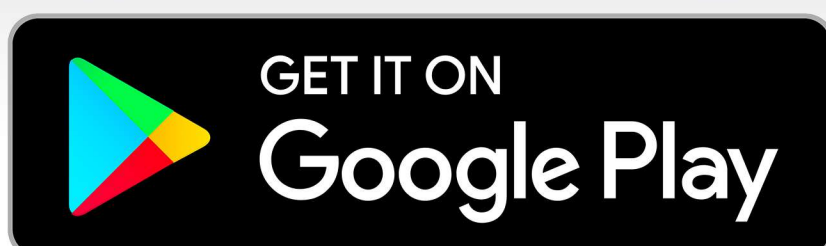

During Hurricane Season, weather can change quickly! It's a must to check the weather at home and in neighbouring countries to know what to expect. Forewarned is forearmed!

Keep Fisheries Early Warning and Emergency Response (FEWER) Weather module handy to access weather information from local and international sources into one fisher-friendly interface. Use the options to share weather reports with other fishers and offline reports.

Act now and make sure you know whom to contact in case of emergency at sea! FEWER and fishers' cell phones are companions to the VHF radio and GPS that together provide information and communications for safer fishing trips.
